Software Engineer

Seattle, WA

SKILLS

Familiar: Node, Redux, Git, Ruby, JavaScript, React.js

Learning: Rails

PROFESSIONAL EXPERIENCE

Software Engineer

Outreach.io, 2017

- Build new features in React JS for single page web app using ES6, Babel, and Webpack.
- Develop backend functionality in Ruby on Rails to flesh out Voice capabilities for the Outreach platform.
- Collaborate on a front end focused team with agile development methodologies.

LEAP Apprentice

Microsoft, 2017

- Five weeks in classroom being mentored by senior Microsoft engineers.
- Learned basics of building applications in the Microsoft stack.
- Covered topics including maintainable coding techniques, test driven development, object oriented programming, and learning a new codebase.

Web Developer

IUNU, 2016-2017

- Delivered client facing MVC framework React.js web application using MongoDB, Redux, HTML, CSS, and JavaScript.
- Built an MVP data aggregation tool over the course of one month in a three-person team
- Redesigned a second iteration of the same tool over two weeks featuring a robust front end, code review and refactoring, incorporated Redux into a new boilerplate, and implemented a Redux feature for the app contributed bug fixes.
- Learned Redux, Meteor, and MongoDB through self-study over the course of two weeks.
- Researched industry standard image processing tools, cloud storage systems, as well as doing data comparison on best ways to manage large image processing.
- Contributed to product roadmap the software engineering team used throughout the project.

EDUCATION

Bachelors of Arts

Susquehanna University, 2013

EXTRACURRICULAR

Mentoring, 2016-2017

- Formal tech event mentoring covering transition from nontraditional backgrounds into tech.
- One on one mentoring including job search technique and integration into the tech world.
